**Subject:** Development of a plan for public participation for upcoming actions regarding Veolia ES Technical Solutions, L.L.C.

Everyone,

In January 2013, EPA proposed to reopen a Clean Air Act Title V operating permit issued in 2008 to Veolia ES Technical Solutions, L.L.C. (Veolia) to, among other things, add operating parameter limits and enhanced monitoring provisions to the permit requirements. After taking comment on the draft permit, because of the timing in relationship to the expiration of Veolia's operating permit and the regulatory requirement for Veolia to perform compliance testing, EPA decided instead to incorporate revisions into Veolia's permit at renewal. Therefore, within the next several months, EPA will be providing for public comment a draft of the permit which EPA proposes to issue to Veolia. EPA also will provide a response to the comments received on the permit proposed in January 2013 at the time we public notice the draft Title V renewal permit.

As with the January 2013 draft permit, we would like to develop a plan for public participation to ensure that community members and interested parties have meaningful involvement in the permitting process. We would like to host a call to discuss how you thought the permitting process ran last time, any changes or improvements you think could be made to the public participation process, and whether there was anything we did that was not particularly useful in aiding community members' understanding of the process or the draft permit itself. While we may not be able to act on all of the suggestions, we will consider all of them. Please note, however, that we will not discuss during that call any issues regarding the substance of the permit that we are developing.

We would like to hold this call sometime between March 24 and April 3, 2014. If you are interested in participating, please provide me, by the close of business on Monday, March 17, times that you would be available to participate in such a call. We will schedule the call to accommodate as many interested parties as possible.

Thank you for your time and we look forward to your suggestions.
